

YAWAL

Aluminium doors

Durability and beauty for years to come

YAWAL

Yawal S.A. is one of the leading suppliers of architectural aluminium systems and one of the pioneers of this industry in Poland.

We are a Polish company established in 1990.
We have been operating successfully for 35 years, creating high-quality aluminium systems and continuously seeking new opportunities for growth.

Why Yawal?

- 35 years on the market with continuous innovation
- Research and development team and testing laboratory
- Complete in-house production chain
- A team focused on precision, quality and customer service
- The production process concentrated within one capital group – Yawal S.A. and Final S.A.
- More than 50 technologically advanced system solutions
- MoreView – the most innovative sliding door system on the market
- A wide range of fire-resistant and burglar-resistant solutions
- Designing unique solutions tailored to project requirements
- Continuous work on expanding and improving our offer
- **Values:** experience, professionalism, commitment, innovation, customer focus, ecology

Aluminium doors

Durability and beauty for years to come

- ☑ Durability, energy efficiency and design without limits. From compact dimensions to large-format entrances – always stable, resistant and aesthetically refined.
- ☑ Aluminium doors are an ideal solution for both modern and classic designs.
- ☑ Maintenance-free, with attention to every detail.

DURABILITY

Deformation-resistant material — the doors retain their shape for many years

LARGE-FORMAT CAPABILITIES

Stability even at very large dimensions

ENERGY EFFICIENCY

Thermal transmittance even below 0.8 W/(m²K) — ideal for passive construction

EXCEPTIONAL DESIGN

Extensive finishing and customisation options — from classic styles to modern trends

EASY MAINTENANCE

No need for time-consuming maintenance* — everyday convenience

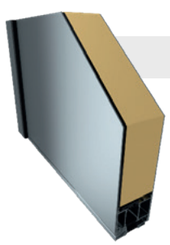

VERSATILITY

Suitable for both modern and traditional homes — one solution, many possibilities

SINGLE-SIDED OVERLAY

These infills are made of aluminium facing sheets. On the outside, a 3 mm thick aluminium sheet is bonded to the door frame, keeping it concealed, while glazing beads are used on the inside. This construction gives the door an elegant and cohesive appearance.

DOUBLE-SIDED OVERLAY

Double-sided overlay infills are designed to provide the highest level of door insulation. Aluminium facing sheets cover the door leaf on both sides, resulting in a premium-class door in terms of elegance and aesthetics. In this configuration, the total infill thickness is the greatest and is adapted to the specific door profile system.
